**Multiplication Fact Checkers**

1. Give students two copies of use blank checker board (on next page)

2. Students create a math fact sheet (like the sample below) using one blank board and a math fact key on the second blank copy

3. As students move their checker piece to a square containing a fact, they must answer it correctly to remain on that square

4. Once students are ready to begin playing chess, they may use these boards as well
